Forecast for Thursday 28 Apr 2022

Weather: A chilly start with any early valley mist quickly clearing to leave a dry morning with some long sunny intervals. The odd patch of low cloud may cover summits in the east at first, but this will quickly lift, with cloud bases staying clear of the summits for the rest of the day.

Chance of cloud-free hill tops above 600m: 100%

Low cloud and visibility: Early valley mist may give briefly locally poor visibility around dawn, and patchy low cloud in the east around dawn will cover some slopes above 500m also giving locally poor visibility. Any low cloud in the east will quickly lift in the morning and cloud bases should remain clear of summits for the rest of the day with good visibility at all levels.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Layers are recommended as even with light winds it will still feel close to or below freezing on the summits during the morning. UV levels may be strong in any sunshine on the higher routes, and sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:

Forecast for Friday 29 Apr 2022

Weather: Another cold start to the morning, with some patches of valley mist and shallow fog. These will quickly clear to leave another dry day with often sunny skies and with cloud bases holding clear of the summits.

Maximum wind: East to northeasterly 15-20mph.

Chance of cloud-free hill tops above 600m: 100 %.

Low cloud and visibility: Early valley mist and shallow fog may give briefly locally poor visibility around dawn, but cloud bases should remain clear of summits with good visibility at all levels.

Temperature: **Valleys:** Zero Celsius becoming plus 14 Celsius by mid-afternoon.
At 600m: Plus 3 Celsius.
Freezing level: Above the summits.
